PROFESSIONAL SUMMARY

Frontend Developer with 6+ years of experience building scalable, well-tested React applications used by thousands of users. Experienced across the full delivery lifecycle, from requirements discovery and technical analysis to architecture, implementation and automated testing. Strong focus on TypeScript, performance, accessibility and maintainable frontend systems.

EXPERIENCE

May 2019 - Present

Software Developer VOID Software

- Own frontend delivery for a React application used by thousands of users, from requirements discovery and technical analysis through solution planning, architectural decisions, implementation and testing.
- Collaborate with product, design and backend teams to translate business needs into accessible, responsive and type-safe interfaces.
- Improve performance and long-term scalability through reusable frontend patterns, predictable Redux state management and maintainable Sass foundations.
- Strengthen release confidence through unit, integration and end-to-end testing with Jest, Testing Library, Cypress and Playwright.

September 2016 - April 2019

IT Professional Fátima Hotels Group

- Built and maintained internal PHP and C# applications tailored to day-to-day hotel operations, turning recurring business requirements into practical digital workflows.
- Managed SQL Server databases, SSIS integrations and SSRS reporting, improving access to operational data and reducing reliance on manual processes.

TECHNICAL SKILLS

Core frontend	React, TypeScript, Next.js, JavaScript, HTML, CSS, Sass
State and integration	Redux, Context API, REST APIs, WebSockets
Testing and quality	Jest, Testing Library, Cypress, Playwright, Accessibility, Performance
Tooling and delivery	Git, Vite, Jenkins, Docker, AI-assisted development
